## OUR SERVICES

### Freight Management

Freight management involves the process of organizing inbound and outbound goods for transport either by Road, Sea or Air. This process ensures that the right products get to the right places in the right timeframe and at the right price. We at TML, brings to each client the assurance and the satisfaction of dealing with a professional logistics management group. We offer assistance and service for freight forwarding of goods by all the three or mix of three modes of transportation i.e. Air, Sea and Road.

We facilitate the entire forwarding process according to client's specifications in alignment with the requirements of the import and export regulations applicable to specific country. Our long-term service relations with many freights forwarding - shipping lines and freight forwarding international airlines ensure confirmation of shipments on pre-confirmed dates and at the most economical cost.

Air Freight

Ocean  
Freight

Domestic  
Transport

## Custom Clearance

This involves, preparation and submission of documentations required to facilitate export or imports into India, representing the importers /exporters during customs examination, assessment, payment of duty and ensuring delivery of cargo from customs after clearance along with the supporting documents. TML has domain expertise and experience of rendering assistance related to Custom Clearance.

It's our endeavor to provide the assistance in respect of clearance of goods, which is not only reliable but also ensures the clearance in an expeditious manner complying with the applicable regulatory requirements of the underlying product.

## Warehousing

Warehousing involves storing of physical inventory for subsequent sale or distribution to the end customers either domestically or to the overseas customers. The very intent of warehousing is to temporarily store products in bulk before either shipping them to other locations. With the expansion of global supply chain, the Warehousing plays a crucial role in timely and cost effective delivery of the goods to the customers.

## 3PL Logistic Solutions

Third-party logistics (3PL or TPL) involves use of third-party businesses resources to outsource various elements of supply chain of an organization particularly distribution, warehousing, and other allied services. We at TML specialize in providing integrated operations of warehousing and transportation services that can be scaled and customized to customers' needs, based on market conditions, to meet the demands and delivery service requirements for your products.

Services often extend beyond logistics to include value-added services related to the production or procurement of goods, such as services that integrate parts of the supply chain. Our endeavor is to extend the support particularly in respect of functions within the supply chain management, such as warehousing, transportation, or raw material provision etc.
